

DISCRETE MATHEMATICS
VOLUME 124, NUMBERS 1-3, 1 JANUARY 1994

CONTENTS

Preface	1
<i>K.S. Bagga, L.W. Beineke, M.J. Lipman and R.E. Pippert</i> Edge-integrity: a survey	3
<i>D. Bauer, A. Morgana and E. Schmeichel</i> On the complexity of recognizing tough graphs	13
<i>N. Biggs</i> Combinatorics and connectionism	19
<i>H.J. Broersma and I. Schiermeyer</i> A closure concept based on neighborhood unions of independent triples	37
<i>A.E. Brouwer and M. Numata</i> A characterization of some graphs which do not contain 3-claws	49
<i>I.J. Dejter</i> On symmetric subgraphs of the 7-cube: an overview	55
<i>M.A. Fiol</i> The superconnectivity of large digraphs and graphs	67
<i>M. Gionfriddo and Z. Tuza</i> On conjectures of Berge and Chvátal	79
<i>H. Gropp</i> Nonsymmetric configurations with natural index	87
<i>F. Harary</i> Sum graphs over all the integers	99
<i>A. Hartman</i> The fundamental construction for 3-designs	107
<i>I. Krasikov and J. Schonheim</i> On near subgroups	133
<i>L. Lovász</i> Stable sets and polynomials	137
<i>C.J.H. McDiarmid and A. Sánchez-Arroyo</i> Total colouring regular bipartite graphs is NP-hard	155
<i>J.W. Moon</i> Some determinant expansions and the matrix-tree theorem	163
<i>E. Sampathkumar and G.D. Kamath</i> A generalization of chromatic index	173

<i>J. Širáň and M. Škoviera</i> Regular maps from Cayley graphs II: Antibalanced Cayley maps	179
<i>B.D. Thatte</i> Some results and approaches for reconstruction conjectures	193
<i>C. Thomassen</i> Embeddings of graphs	217
<i>H.J. Veldman</i> On dominating and spanning circuits in graphs	229
<i>P.D. Vestergaard</i> Two-cacti with minimum number of spanning trees	241
<i>D.J.A. Welsh</i> The computational complexity of knot and matroid polynomials	251
Author index to volume 124	271
